PROFILE

I am a focused, self-motivated, goal-driven, and hardworking young lady with good knowledge of mobile and web application development. Skilled in HTML, CSS, JavaScript, jQuery, Bootstrap, and Python. Good in problem-solving, critical thinking, analysis, time management, teamwork and have good communication skills.

EXPERIENCE

February 2020 – *IT Intern, Data Sciences Corporation*
December 2021

My role involved web and mobile application development, researching new tools, languages, and platforms to use in development. Compiling application development documentation. Debugging and troubleshooting. I had Training sessions in Microsoft power platforms, Project Management, Python, WordPress, Pure storage, Oxide platform, Hydrastore, Backup software solutions, and Infrastructure as code. And responsible for writing weekly and monthly reports.

- Developed a web application that allows users to purchase tickets to events and allow event organizers to upload their events, manage their sales, and check in their attendees on the website.
- Developed a mobile application that allows customers to look for and book services (i.e., Plumbing, Painters, Cleaners, etc.) around their area and allowed users to create accounts and register their services.

February 2019 – *Computer Science Tutor, University of Fort Hare*
December 2019

I was responsible for Helping and assisting computer science students with their practical work, setting, and marking assignments, invigilating during tests, capturing marks, and one on one sessions with the students.
